

Artificial Intelligence (AI) Policy

Global Green Chemical Public Company Limited, or GGC, is a leader in the regional Oleochemical Industry, serving as the green chemical flagship of PTTGC Group. Driven by our vision "To be a Leading green chemical company by creating sustainable value", GGC recognized the importance of Artificial Intelligence (AI) technologies in boosting business competitiveness and optimizing business operations and personnel efficiency, GGC has established the following artificial intelligence policy:

1. Competitiveness and Sustainability Development

GGC shall continuously utilize and develop AI systems to increase creativity and competitiveness and ensure that it creates benefits for and enhances the effectiveness of GGC's personnel and stakeholders and in consideration of social, economic, and environmental sustainability, and good governance.

2. Compliance with Law, Ethics, and International Standards

GGC is committed to developing and utilizing AI systems by relevant laws and regulations, upholding ethical and moral standards of society, and adhering to participative principles involving personnel and stakeholders in decision-making. GGC shall also comply with the best practices and standards set by domestic and international governing bodies.

3. Transparency and Accountability

GGC is committed to the transparent use and development of AI systems. This includes proactively communicating with stakeholders to ensure their awareness when using or interacting with AI, and AI-generated content will be identified. Provisions shall be made to access explanations detailing how our AI systems operate and the key factors that influence their decision-making and output generation. Furthermore, GGC will establish clear usage guidelines to ensure AI is applied appropriately to specific tasks, assign roles and responsibilities for AI governance, and implement systems for promptly diagnosing and responding to errors or issues that may arise from AI systems.

4. Security and Privacy

GGC shall emphasize security, privacy, and data protection for all stakeholders under applicable laws and our internal policies. GGC shall ensure that risk prevention and control measures, along with guidelines and procedures for incident management and mitigation, are in place so that the affected tools or AI systems can return to a safe and normal state and that any damage or adverse effects are remediated.

5. Fairness

GGC is committed to developing and utilizing AI by prioritizing diversity and eliminating biased treatments and discrimination against sensitive factors such as ethnicity, nationality, religion, gender, age, etc. In addition, GGC shall promote the inclusiveness of all groups of users to ensure fairness to all stakeholders both within and outside our organization.

6. Reliability

GGC shall promote AI to produce accurate, reliable, and reproducible outputs through implementing data quality and integrity control. Moreover, GGC shall set up a process and channels for stakeholders to send feedback and complaints.

Scope

This Policy applies to all personnel within GGC, including contractors, subcontractors, partners, vendors, and collaborators involved in any aspect of AI tools usage and development. All personnel must comply with this, and other policies and procedures issued by GGC. Any annexes or appendices issued under this Policy are considered part of the Policy.

Implementation and Penalty

GGC reserves the right to continually access and monitor personnel's use and interaction with AI on any GGC network. Personnel who fail to comply with any provision of this Policy may be subject to discipline or legal punishment under GGC rules and regulations or applicable laws. Violations by contractors and subcontractors may result in the termination of the contract and may be subject to legal punishment under applicable laws.

This policy shall be effective as of 15 May 2025, onwards.
